Summary

MERN Stack Developer with a solid foundation in building dynamic, responsive web applications. Proficient in **MongoDB, Express.js, React.js, and Node.js**, with strong skills in front-end and back-end development. Experienced in designing efficient APIs, managing databases, and creating seamless user experiences. Adept at working in agile environments, solving complex problems, and continuously learning new technologies. Passionate about delivering high-quality, scalable solutions while collaborating with cross-functional teams.committed to collaborating with team members, sharing knowledge, and adapting to new technologies, all while maintaining a keen attention to detail to enhance the overall quality of the projects I work on.

Experience

Explorin Technology

1 July 2024 - 15 August 2024

DSA Training Intern

Roorkee

Completed an internship focused on Data Structures and Algorithms (DSA) using C++, where I implemented and optimized various data structures, enhancing my algorithmic problem-solving skills.

- Developed strong algorithmic thinking and problem-solving skills, applying them to real-world scenarios.
- Worked on performance optimization, ensuring efficient time and space complexity in code solutions.
- Collaborated with peers and mentors to enhance coding practices and receive feedback on complex problem-solving approaches.

Projects

Task Management

20/10/2024

Developed a full-stack task management application using the MERN stack (MongoDB, Express.js, React.js, Node.js) to help users create, organize, and track their tasks efficiently. Implemented features like task creation, editing, deleting, and categorization
